## 1. Qualitative Information for the First Half of the Current Fiscal Year

### (1) Discussion of Operating Results

During the first half of the current fiscal year, the global economy remained unstable due to the economic stagnation in the United States and Europe caused by monetary tightening and rising energy prices, the economic slowdown in China caused by the real estate recession, and heightened geopolitical risks, despite signs of economic recovery in some regions.

In this situation, consolidated net sales for the first half of the fiscal year amounted to ¥133.5 billion, up 0.2% year-on-year. By segment, sales were ¥81.7 billion in the Timepiece segment, ¥43.7 billion in the Consumer segment, ¥5.4 billion in the System Equipment segment, and ¥2.6 billion in the Others segment.

In the Timepiece Business, although G-SHOCK brand sales volume declined, unit prices continued to rise. The situation differed by region: business remained strong in Europe, and recovered in North America, which continues to be affected by inflation, but sales in China declined year-on-year. Overall sales increased and outperformed the initial plan.

In the EdTech Business (education), sales increased. Although sales of electronic dictionaries continue to be sluggish, the scientific calculator business performed well due to the return of classrooms to normal after the pandemic and the steady rollout of the New ClassWiz. In the Sound Business (electronic musical instruments), sales decreased as the market slowdown continued, primarily for entry level models.

Sales in the System Equipment Business decreased year-on-year as market demand remained weak and the large orders received in the PA business in the previous fiscal year were not repeated.

Casio posted an operating profit of ¥8.1 billion, allowing for a ¥3.1 billion loss in adjustment. The Timepiece segment posted ¥10.6 billion in operating profit, the Consumer segment posted ¥1.8 billion in operating profit, the System Equipment segment recorded a ¥1.3 billion operating loss, and the Others segment recorded ¥0.1 billion in operating profit.

Casio posted ¥10.5 billion in ordinary profit and ¥7.2 billion in profit attributable to owners of parent. Earnings per share (EPS) were ¥30.79.

### (2) Discussion of Financial Position

Total assets on a consolidated basis at the end of the first half of the current fiscal year stood at ¥343.3 billion, up ¥8.1 billion compared to the end of the previous fiscal year. Net assets increased to ¥222.7 billion, up ¥1.1 billion compared to the end of the previous fiscal year. As a result, the equity ratio was 64.9%.

Net cash provided by operating activities was ¥21.6 billion, net cash used in investing activities was ¥5.6 billion, and net cash used in financing activities was ¥15.5 billion. As a result, consolidated cash and cash equivalents at the end of the first half of the fiscal year was ¥136.1 billion, an increase of ¥5.8 billion compared to the end of the previous fiscal year.

Casio will continue to pursue effective management of its business assets, aiming to build a stable and strong financial structure.

### (3) Discussion of Forward-looking Statements, including Consolidated Results Forecasts

Casio assumes the outlook for the global economy during the current fiscal year remains unpredictable due to heightened geopolitical risks and global monetary tightening caused by continued inflation.

In this business environment, reflecting currently available information and the better-than-anticipated financial results for the first half of the fiscal year ending March 31, 2024, Casio has revised the full-year consolidated financial results forecasts as follows.

(Consolidated results forecasts)

Net sales:	¥275.0 billion (up 4.2% year-on-year)
Operating profit:	¥18.0 billion (down 0.9% year-on-year)
Ordinary profit:	¥20.0 billion (up 2.2% year-on-year)
Profit attributable to owners of parent:	¥14.0 billion (up 7.0% year-on-year)

Notes concerning results forecasts

- 1) Exchange rates are estimated at US\$ 1 = ¥145 and Euro 1 = ¥153.
- 2) The forward-looking statements including business results forecasts are based on information currently available to the company and on certain assumptions deemed to be reasonable. Actual business results may differ substantially due to a number of factors. Key factors affecting actual business results may include, but are not limited to, the economic circumstances surrounding the company's business, fluctuations in the exchange rates of major currencies including the yen-dollar rate, and significant changes in product prices.
