

Environmental Management

Implementation framework

The annual Casio Environmental Conferences decide on the company's specific environmental plans, including its environmental policies and action plan targets. Positioned within the conference are special committees that deal with environmental issues shared by all group companies. Each business site and group company then implements the policies and plans.

Casio is currently reviewing the structure of the Casio Environmental Conservation Committee. The new organization chart is expected to be ready by the next time this site is updated.

An environmental management system (ISO 14001) has been adopted at the main sites as an environmental management tool.

List of ISO 14001 Certified Sites
