Casio Announces Postponement of First-Half Financial Results Release

Casio Computer Co., Ltd. announced today that it has decided to postpone the release of financial results for the first half of the fiscal year ending in March 2025, which was originally scheduled to take place on November 6, 2024. The company deeply regrets any inconvenience this may cause to our shareholders and other stakeholders.

1. Reason for Postponement

As mentioned in the announcement dated October 11, 2024, "Notice of Partial Service Outage and Information Leak Caused by Ransomware Attack," Casio servers suffered an unauthorized access on October 5, 2024, requiring access to accounting-related data to be restricted. This has delayed the preparation of the financial statements and the review process by the auditing firm. As a result, Casio has to postpone the first-half financial results release.

2. New Schedule for the Announcement

Casio will announce the new release date as soon as it is determined. Currently, Casio is planning for mid-November 2024. If the release is to be delayed beyond November 14, which is 45 days after the end of the first-half period, Casio will provide an update promptly.

3. Impact on Financial Results

Casio is carefully examining the impact of this incident on its financial results. Should any material information arise, Casio will disclose it promptly.
