3. Reason

The company’s dividend policy is based on maintaining stable dividends, and Casio decides the allocation of profit by taking into account all factors such as profit levels, financial position, the dividend payout ratio, and future business expansion and forecasts.
Guided by the above policy, and considering the full-year consolidated financial result forecast for the fiscal year ending March 31, 2027 and other factors, Casio has decided to increase the interim dividend per share from 22.50 yen paid in the previous fiscal year to 25.00 yen and to revise the year-end dividend per share forecast from "to be determined" to 25.00 yen. As a result, the annual dividend per share for the fiscal year ending March 31, 2027 is expected to be 50.00 yen.
